It can be rested too without starvation. Kodol will do it. Kodol performs the digestive work of the tired stomach and corrects the digestive apparatus. Kodol fully conforms to the provisions of the National Pure Food and Drug Laws. Recommended and sold by Crenshaw & Young.

If the accommodations at the stock pens in this city were as uncomfortable, as crowded, as dangerous to health and as disgusting, relatively, as the Missouri Pacific passenger station and its environs during such weather as this, the Society for the Prevention of Cruelty to Animals would be heard from. The people of Lexington ought to see to it by every means in their power that the railroad does not profit by treating the people in this way.

For Thin Babies

Fat is of great account to a baby; that is why babies are fat. If your baby is scrawny, Scott's Emulsion is what he wants. The healthy baby stores as fat what it does not need immediately for bone and muscle. Fat babies are happy; they do not cry; they are rich; their fat is laid up for time of need. They are happy because they are comfortable. The fat surrounds their little nerves and cushions them. When they are scrawny those nerves are hurt at every ungente touch. They delight in Scott's Emulsion. It is as sweet as wholesome to them.

Send for free sample.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

Mason and Dixon's Line.

Many persons are of the opinion that Mason and Dixon's line was the line of separation between the slave and free states. And it must be admitted that the utterances of political orators have tended in a general way to create or uphold such a belief. The fact is, however, that the demarcation between the north and south, so far as slavery was concerned, was the parallel of 39 degrees 30 minutes, so settled by the Missouri compromise of 1820. Whereas Mason and Dixon's line was the parallel of 39 degrees 43 minutes and was established as the line of separation between the states of Pennsylvania and Maryland. It was drawn by two noted English surveyors, Charles Mason and Jeremiah Dixon, who began their work in 1763 and finished it in 1767. The line was marked at intervals of five miles by large stones, showing the arms of Lord Baltimore on one side and those of the Penn family on the other. Between these intervals of one mile were set smaller stones, showing the letters M. and P.,—the initials of the two states.
